

1. I believe the best thing we can do to to secure sexual & reproductive health in our district is first keeping the money that funds these programs in the district, by doing this we can keep more actability of where the money is being used. What we must also realise is even if the Fed cuts funding, the programs can still be funded by us. We must remind ourselves that after-school care, teen pregnancy,etc is the responsibility of the community and we must personally get involved.
2. A. To affirm the humanity of all people not just transgender people, we must start treating everyone like individuals, and not treat people differently because they may look , talk or believe differently than you. The best thing policy makers can do is make sure the law is blind and treats everyone the same.

B. I want to stop the transfer of power/money from our communities to Sacramento, by doing this it will empower communities of color and give us the means to take care of ourselves. The thing we must realize with dealing with white supremacy is hate can not get rid of hate, we must do something hard and get to know the white supremacies and once we get to know each other as just human beings, the hate will start to disappear.

3. Yes, the government has to be transparent and open to the public. By being transparent the people can keep the government accountable.

4. Yes, California needs to change its laws so that law enforcement's use deadly force only when reasonably necessary. But if we want to end police brutality we have to do two things end the war on drugs, which is the cause of so much harm in our communities. Second patrol our own communities, to prevent crime.

5. A. I don't support SB 562 because i believe it will give the too much power to politicians.

B. I'm against any laws that target/ criminalize people for being homeless. I am against a state wide housing trust but i do support local housing trust funds.

6. The problem we are facing is not that the courts are underfunded but the courts have to enforce too many unjust laws. We need to end the war on drugs which origins are of racial discrimination and not public safety. We also have to fix our traffic courts system to be used to educate bad drivers and not use traffic tickets as a money making machine.

7. Yes, i support getting rid of any loopholes, and tax everything the same, but we must find a way to also easy the tax burden for the average Californian, because right now we are paying too much for the quality of the services we are getting in return.

8. Yes supporting SB-10 is just the start but the real issue are the laws on the books, we have too many unjust laws, such as the war on drugs. So in order to truly reduce the need for bail we need to get rid of the laws that are meant to control personal behavior and not safety.

9. I could i would pardon all nonviolent crime so they won't go to prison, this will free up money to use to prevent crime. And for all violent crime i would have prisons job focus on making sure prisoners don't go back to prison, by giving prisoners the opportunity to themselves, so when they are freed they have the knowledge to be a productive member of society. As of reducing violent crime sentences i think it should be done at a case by base scenario so they can go on parole.

10. Being honest, if you banned suspending by willful defiance schools are going to suspend kids for a different reason, we need to solve the real problem of why kids are misbehaving in school. We need to fix our school system so that kids want to go to school to learn, by making it enjoyable. For the meantime i will support a bill that prohibits "willful defiance" because it may help some kids that are just misunderstood.

11. I think if a school wants they can have law enforcement in their school, when i went to school the majority of kids didn't have a problem with the sheriff. So the real problem is our school's environment, until we fix that we will be treating symptoms of a problem not the cause. As for alternatives to citings i would advocate community service.

12. If California can bar immigration authorities from school campuses and prohibit schools from sharing information with immigration authorities, i would support any law that does that. And the best thing California can do to not scare immigrants students and families is remind people that it is not the job of local or state government to enforce federal laws.

13. No, because to my understanding laws like SB 1050 are just to get more people to college/universities and the fact is not everyone needs to go to college./ universities, right now we have % of college grads going to college and getting themselves thousand of dollars in debt to work jobs that don't require college education. What we need to do is fix our k-12 education so kids have the qualifications for the real world.

14. I don't believe it's the role of local or state governments to enforce immigration laws

15. I don't believe it is the role of the state to fight the removal process but we as individuals need to donate money or volunteer time to fight the deportation process, we need to get involved..
